

# Shopping Anyone?

## Before Reading

- Where can you buy food?
- What is a shopping list?

## During Reading

- Why do shoppers use lists?
- What are some of the sections of a grocery store?

## After Reading

- Do you shop with your family?
- How would you arrange goods in a grocery store?

Fruit in a store

Let's go shopping at the grocery store. First, make a list of foods we need. Be sure to put soap on the list.

Get a cart and wheel it through the store. The store has many sections. Fresh fruits and vegetables are here. There's the meat counter. Here's milk, eggs, and other dairy products. Boxed and canned foods are there. Frozen foods are here. The bar of soap is with other things that are not food.

Check our list. We want fresh fruit. Let's get apples, pears, and bananas. We need milk, eggs, and cheese from the dairy section. Put frozen green beans, broccoli, and pizza in the cart. Here's the soap we need.

It's time to pay. Go to the checkout counter. A worker scans our things. A worker puts them in bags. Then we pay.

Now let's go home and make lunch. All this shopping makes me hungry.

## Vocabulary

**grocery store:** a place that sells food and things used in homes

**checkout counter:** the place in a store where items are paid for

**scan:** to run items over a scanner to list price

# Classify/Categorize

Read "Shopping Anyone?" Use the chart to group foods the shoppers put in their cart.

Fresh Fruit	Dairy Products	Frozen Foods

# Make Inferences

---

Read "Shopping Anyone?" Answer the questions.
