# Triangles in Hong Kong 

Fly into the Hong Kong airport. You will see lots of triangles on the ceiling. They help support the building.

A triangle is a flat shape with 3 sides and 3 corners. Another word for corner is vertex.

This play dome looks like half of a ball. It is made out of many triangles.

These triangles look different.
a. How many sides does triangle 1 have?
b. How many sides does triangle 2 have?
C. How many sides does triangle 3 have?
d. What is the same about the triangles?
e. Which one of the triangles is most like the ones in the dome?
