Electric force occurs between two objects with a charge. Objects can have a positive or negative charge. Opposite charges attract. But two objects with the same charge will push each other away.

This force starts with tiny atoms. Every atom is made up of even smaller parts. One of those is the electron. Electrons have a negative charge. They orbit the nucleus, or center, of an atom. The nucleus holds neutrons. Neutrons have no charge. They are neutral. The nucleus also holds protons. Protons are positive. Positive protons attract negative electrons. As a result, electrons stay in orbit. That's electric force.

Electric force also causes electrons to leave atoms. Electrons are attracted to atoms with more protons than electrons. Those atoms have a greater positive charge. Electrons can jump from one atom to the next. This electric force makes electricity. Electricity provides us with light in our homes and schools. It also allows us to talk on cell phones and watch TV. They're tiny, but atoms can make a big difference!
Exploring Science

Grades K-6

Captivate the next generation of scientists with the power of informational texts. Build science content knowledge and literacy with our new Exploring Science series!

Each grade-level curriculum kit features:
- ✔ Leveled Readers (15 titles, 6 copies each) aligned to instructional segments in the California Science Framework
- ✔ Teacher-friendly Lesson Plans aligned to the California Science Framework and Standards
- ✔ Hands-on Lab Activities and Assessments to build critical-thinking skills
- ✔ Digital Resources including lessons, Interactiv-eBooks, audio, and video
- ✔ Instructional support to help differentiate and scaffold instruction

See how we align at
www.tcmpub.com/california-science
**Leveled Readers**

Build inquiry skills and reading comprehension with books that present key scientific information in accessible and interesting formats.

- **Water Bodies**
- **Balanced and Unbalanced Forces**
- **Extreme Weather**
- **Tracking Our Weather**
- **Rocks and Minerals**
- **Fossil Fuels**

Books offer students access to high-quality informational text and scientific investigations.

**Lessons and Activities**

Books feature an accompanying teacher-guided lesson, an embedded lab activity that addresses reading and science objectives, and a culminating activity.

**Digital Resources**

Interactiv-eBooks guide students toward independent reading and include video, audio, drawing, and annotation functions to deeply explore key science topics.

Components subject to change.

www.tcmpub.com/california-science • (800) 858-7339
Grade K
Spark the curiosity of young learners with vivid images, easy-to-read informational texts, fun lesson plans, and more! Each resource supports scientific content with engaging activities for a hands-on learning experience.

These 6-Packs with Lesson Plans are aligned to instructional segments in the California Science Framework.

What to Do

1. Pretend that the ball is the moon, your head is Earth, and the lamp is the sun.
2. Hold up the ball and move it in front of the light.
3. Notice how it changes. How many phases can you see?

Your Turn!

Let's Do Science!

Fun hands-on activities reinforce lessons and scientific concepts.

Components subject to change.

Why does the moon look different at night? The lights off. The lights off. They are like shadows on the moon.

---

…Easy-to-read text clearly explains basic concepts, while colorful photos of familiar objects enable students to better grasp the ideas. Interactive elements, such as ‘Your Turn!’ and ‘Let’s Do Science!’ invite students to apply what they’ve learned through hands-on activities.

—School Library Journal

...Both the content and the lively presentations will leave readers pleased as well as better informed.

—School Library Journal

...The books have a friendly tone that strikes the perfect balance between matter-of-factness and wonder...A carefully described but open-ended project and observation-based activity conclude, encouraging readers to extend their own scientific exploration.
