Lesson Plans and Student Guided Practice Books

Students will learn how to be active math learners through explicit instruction of mathematical strategies. Each lesson focuses on key mathematical concepts and procedures from guided practice to independent application.

Teachers can prompt students with Think Alouds, establishing investigative questions and modeling mathematical examples and tasks.

Students progress through the problem-solving process, asking questions, thinking aloud, and clarifying their understanding in writing.

The Student Guided Practice Books include a Quick Check and Math in the Real World concept task for ongoing progress monitoring.
